POLICE DEPARTMENT

For quite some time it has been obvious that the Town of Londonderry with it's 47 square miles and continued high increase in population should establish an organized Police Department.

On April 2, 1961 the Board of Selectmen appointed Alfred Conner temporary Chief of Police for the initial duty of organizing and obtaining outside qualified personnel to lecture and instruct the men chosen to make up the new department. The New Hampshire State Police, the County High Sheriff and the Local Court assisted in this effort.

At the end of 4-1/2 months Mr. Conner recommended to the Board of Selectmen that Frederick Ball be appointed Chief to carry on as the head of the department of 16 men. This was done.

A Blue Telephone Network was installed with telephones at strategic locations, providing coverage 24 hours the day. This at a total cost of \$27.30 per month. Through the cooperation of the Derry Police Department, 3 of our officer's cars are equipped with 2 way radios at no cost to the town.

The Board of Selectmen believe that the citizens of the town should know the amount of the work load that this department has had for the nine months involved.

SCHOOL BOARD REPORT

At the beginning of this school report are the drawings and description of our new building. These recently appeared in the New Hampshire Architect's Magazine. The six room addition was finished last Spring and occupied at the start of the school year in September.

We were fortunate in being able to sell our school bonds at an attractive rate of interest. The building costs, including the canopy on the South side of the new building, were well within the bond issue. The rooms are large and well lighted, each has forced ventilation.

A new larger boiler was installed, sufficient to take care of future expansion. The old fuel tank was replaced with a much larger 6200 gallon tank. This resulted in greater savings in the cost of fuel. The water system was improved and the parking area was expanded and hard topped.

With the expanded facilities it was possible to institute a departmentalized method of instruction in the seventh and eight grades. With the present staff of competent teachers and principal totaling 14 and a student enrollment of 420, we now have an educational institution of great size of which we may be proud.

We wish to recognize the contributions of the Superintendent of Schools, Mr. Parkinson and the building committee, composed of the following members:

A. Conner	A. Strino
G. Thibeault	J. Lacopolis
R. Taylor	S. Wing
G. Hicks	F. Ball
W. Mack	W. Lievens

REPORT OF THE HELPING TEACHER

The curriculum of a school must of necessity, be constantly reviewed and revised if we are to maintain a program that will be in harmony with a changing society.

For this reason, several changes have taken place in the Londonderry school program during this past year. The introduction of the departmental type system in grades seven and eight has proven, thus far, to be very satisfactory. Through this system all youngsters receive the benefits of instructors teaching in their major fields. An additional aid with this program has been the assignment of pupils of like ability to the same class, thus making it easier for the teachers to provide for individual needs.

The additional classrooms and teachers have provided for smaller classes in the lower grades. Teachers are now able to provide more individual help in the various areas.

The combination of Educational Television Programs and the new Audio-Visual Aids have greatly enriched the curriculum. Many of these aids have been purchased with the assistance of the Federal Government through the N.D. E.A. program.

One area being reviewed at the present time is in the area of text books. As the need arises changes will take place.

Through the State Department of Education several new curriculum guides have been set up and made available to the schools of New Hampshire. These guides are very helpful because of their suggestions and procedures they recommend.

The combined efforts of the school board, superintendent, principal and teachers have given Londonderry a school to be proud of. It has been a very pleasant and rewarding experience working with them.

Respectfully submitted,

JOHN M. WALSH
Helping Teacher

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Londonderry School Board:

I herewith submit my twentieth report as superintendent of schools of Londonderry.

STATISTICAL REPORTS

ENROLLMENT

The total enrollment for grades one through eight as of January 15, 1962 was 438. The total enrollments as of the same date for the past three years were 1961 - 439, 1960 - 404, 1959 - 381.

The actual membership as of January 15, 1962 by grades was:

Grades	1	2	3	4	5	6	7	8	Totals
Central	72	57	55	42	53	52	34	53	418

The number of Londonderry pupils attending high school on the same date was:

School	9	10	11	12	Totals
Pinkerton	28	21	18	17	84
Memorial	34	17	16	10	77
Alvirne	4	1		2	7
Nashua	1		1	1	3
Lowell	—	—	—	1	1
	67	39	35	31	172

Statistics for the School Year Ending June 30, 1961

Total Registration	447
Half days schools were in session	360
Average Membership	407.0
Average attendance	378.3
Per cent of attendance	93.0
Pupils transported at district expense	381.2

The elementary enrollment varied from last year by very little. The total enrollment decreased by 1 and the actual enrollment increased by two. The secondary enrollment as anticipated showed a tremendous increase. The enrollment is 172 contrasted with 122 last year. There is a potential increase of 20 more students in 1962-63. With increased high school tuition the impact is serious on the economy of the town.

PERSONNEL

There was the heaviest turnover in teaching staff in many years. With one of the staff called to military duty, 4 resignations and two additional teachers 50% of the staff were new in Londonderry. All were graduates of New England Institutions and two had previous teaching experience. The increasing demand for teachers because of larger enrollments is creating a situation that will require a salary schedule comparable to those of neighboring communities.

Despite the large number of new teachers the staff is a working unit that is accomplishing a great deal for the Londonderry pupils. The scheduling of teacher time to utilize strengths in special or academic areas has been developed to a greater extent than usual in the school. This was quite desirable with such a large turnover in staff. Its worth can be evaluated in terms of pupil progress only after some experience with it.

EDUCATIONAL PROGRAM

The curricula of both levels of public education, elementary and secondary are the subject of scrutiny and change. The emphasis on science, mathematics and foreign language is due in part to the subsidization in these areas by the National Defense Act. In addition the guidance activities at both levels (elementary and secondary) have been expanded generally throughout the country. This phase of an educational program is designed to make possible the greater beneficial use of human resources. The waste of human resources should, if possible, be avoided. Any program that minimizes the loss of human abilities should be cultivated.

The school through the efforts of the professional staff is striving to increase efficiency of teaching and learning in the academic areas. The professional groups, teach-

ers of science, teachers of mathematics and others are proposing revisions in course content that will enable our young people to move more quickly in the advance studies in these disciplines. Administrators are working with modern equipment to find ways to expedite the learning process. All of these activities and there is much overlapping and coordination of the varied programs are designed to furnish our youth with the background skills and basic tools to cope with the problems of the space age. Scientific, economic and social problems are old but ever changing. If we have the wisdom to equip American youth with the necessary knowledge, to inculcate the proper and desirable attitudes and to provide the necessary skills, the future for them, this nation and the world is one of great promise. This, educators everywhere are striving to do. The school and the district are contributing to this effort. May the contributions of all culminate in success.

FINANCES

The proposed budget without special articles is increased \$17,274.24. The bulk of the increase \$15,965.00 is in one item high school tuition. This item is practically statutory. With increased tuition charges (State Average for 1962-63 is \$457.00) and increased numbers the resulting increase in the tuition item in the budget is large. It will continue to increase until both variables stabilize. Other increases are counterbalanced by decreases in some budgetary areas.

The cooperation of all concerned with the educational program has made it possible to provide for the progress of Londonderry pupils to the full extent of each pupils' ability. It is pleasant to attempt to meet the needs of children under these conditions.
